PROFILE

Compassionate, dedicated, and patient-focused Registered Nurse, offering comprehensive clinical background in cardiovascular and surgical intensive care area, as well as hospital and community care settings. Interested in acceptance to attend Certified Registered Nurse Anesthesia master's program. Committed in combining clinical nursing expertise with organizational leadership, growth management, and productivity enhancement.

- Experienced in working with a wide variety of patient groups across whole life course and demonstrating a full range of clinical severity within the full range of care settings
- Exemplifies full responsibility for clients' diagnostics care and treatment, both as a professionally qualified care coordinator and also within the context of a multi-disciplinary care plan

AREA OF EXPERTISE

- Direct Patient Care
- Charting & Documentation
- Diagnosis and Treatment Care Planning
- Health Teaching
- Hemodynamics (cardiac, surgical, and trauma patients)
- Patient and Family Communications
- Critical Thinking
- Home Medication Advice and Review

CAREER BACKGROUND

- Demonstrated expertise in assessing life-threatening conditions in cardiac, neurological, surgical trauma patients. Assessed patients and maintained a sterile and safe surgical environment. Integrated and coordinated patient care throughout the surgical care continuum
- Endowed surgical patient care by assessing, planning, and implementing appropriate nursing care that the patients need before, during and after the surgery
- Provided pre and post-operative patient education and monitored patient's physical and emotional well-being and maintained patient safety (correct surgical site, patient consents, and providing "time-out" prior to surgical procedures)
- Monitored the patient's blood pressure, temperature, and breathing during conscious sedation
- Managed technical equipment and implemented new technologies to improve patient care outcomes
- Ensured clients and their care were provided with written statements of their "Rights and Responsibilities," as well as safe storage of the client's valuables
- Provided ongoing monitoring and reporting of patients' mental state
- Coordinated with staffing issues by handling responsibilities along with monitoring; dealt with families regarding hospital policies; performed primary nursing care; and treated patients recovering from medical surgery
- Organized and facilitated training for staff development and professional enhancement
- Validated policies and procedures among staff members; "ensured that pre-op medications were given; and followed all doctor's order before the surgery process
- Provided pre and postoperative patient education and monitored patient's physical and emotional well-being.
